

CERTIFICATE OF PENETRATION TESTING

Statement Date: **January 16, 2021**

Ref: Penetration testing assessment (**01-ACA-17112020**)

This is to certify that the Acadiem Group web applications (MarkBook), and the underlying infrastructure has been subject to a red-team, penetration testing assessment using a black-box methodology. The testing utilized extensive exploitation work against the OWASP Top 10 (2017) web application attacks. The organization currently subscribes to an annual penetration testing cycle.

Application: MarkBook (Internet Facing application markbookapp.com & markbook.com)

Vendor: The Acadiem Group
(A division of Asylum Software Inc.)
9 Maryheather Crescent
Freelton, ONTARIO L8B 0Z6

**NO SIGNIFICANT SECURITY WEAKNESSES OR VULNERABILITIES
HAVE BEEN IDENTIFIED AT THE TIME OF THE ASSESSMENT**

Date of Assessment: December 15, 2020- January 16, 2021

Certificate issue date: January 16, 2021

Re-testing is to be conducted on an annual basis by end of December or after any significant change that may affect security of the application or the underlying infrastructure. For clarity, a penetration test is a point in time assessment and is not guaranteed to identify all security weaknesses or vulnerabilities. No assessment can guarantee a totally secure operation of the application or identification of all possible weaknesses due to external dependencies and trust relationships between software components. Changes in the application or the underlying components may introduce weaknesses not present at the time of testing. The above particulars are correct as of the specified date and no representations or warranties are made with regard to the future security or otherwise of the tested application.
